## 突出显示两个曲面相交部分

## 方式一

## 定义要可视化的函数:

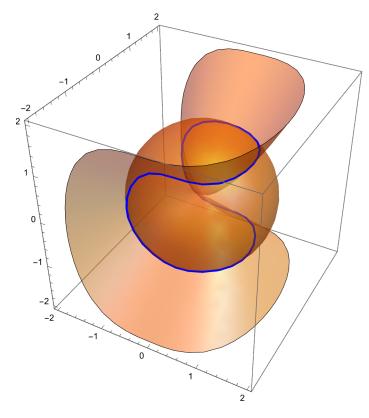

```
ln[97]:= h = x^2 + y^2 + z^2 - 2;
g = x^3 + y^2 - z^2;
```

以 Contour Plot 3D 可视化,突出显示相交部分:

```
ContourPlot3D[{h == 0, g == 0}, {x, -2, 2}, {y, -2, 2}, {z, -2, 2}, L=维等高线

MeshFunctions \rightarrow {Function[{x, y, z, f}, h - g]}, MeshStyle \rightarrow {{Thick, Blue}}, LMARM LM
```

Out[ • ]=

## 方式二

In[104]:=

ContourPlot3D[ $\{h = 0, g = 0\}, \{x, -2, 2\}, \{y, -2, 2\}, \{z, -2, 2\},\$ 

三维等高线

 $Mesh \rightarrow None, \ BoundaryStyle \rightarrow \{\{1,\,2\} \rightarrow \{Thick,\,Magenta,\,Tube\,[0.05]\}\},$ 粗 品红色

 $ContourStyle \rightarrow Directive [Orange, Opacity [0.5], Specularity [White, 30]]]\\$ 

上等高线样式 橙色 不透明度

Out[104]=
